

June 9, 2007 "Summer Starter" Tournament Results

The tournament was held under 'muggy' summer like conditions, with a moderate west wind that caused problems for some anglers. But not those fishing the Theodore Industrial Canal where some rather decent catches were posted by the anglers who persevered through the heat, the humidity and especially the 'trash fish'. And the ONLY Spanish mackerel brought in was actually caught in the bay near there too. The lack of current from the NEAP tide seemed to keep the fish from cooperating for many in other areas.
